**Born  
for  
India**

...what is apparent in this book, more than anything else, is his love for India. When many Indians are ready to do anything to gain an American green card, Fr Jack remains an Indian citizen till today, many years after he returned to his native America. He still carries an Indian passport. "All things considered, there is no other place on earth I would rather be," he says in this book. "India does that to many people. It gets into your blood and life elsewhere is uncomfortable." "...I felt born for India."

Many parts of the book read like a novel. With a keen observation and a refreshing sense of humour, Fr Barrett narrates his varied experiences in an interesting manner.

Editing this book and getting it published here is a humble token of my gratitude for the loving service this American fellow Jesuit has rendered my country.
